

FRANK OCHIGBO, SUNDAY

NOC Engineer | Network Monitoring | Systems Fault Analysis & IT Infrastructure
frankochigbo@gmail.com • +234 903 609 9000 • Abuja, Nigeria (Open to Lagos) • linkedin.com/in/crypterib

PROFESSIONAL PROFILE

Network and systems professional with a B.Sc. in Cyber Security (CGPA 4.34, Second Class Upper) from the Air Force Institute of Technology and an M.Sc. in Communication Information Systems currently in progress. Experienced in monitoring IT infrastructure, identifying network faults, escalating issues, and maintaining system uptime across enterprise environments. Proficient in a range of network analysis and vulnerability assessment tools including Wireshark, Nmap and Nessus, with a strong foundation in fault detection, documentation and structured reporting. Brings a disciplined, self motivated approach to operations support, with the ability to work effectively under pressure and maintain focus during high demand periods.

PROFESSIONAL EXPERIENCE

IT Support Intern (NYSC) | Infrastructure Concession Regulatory Commission (ICRC), Abuja Jan 2025 – Jan 2026

- Monitored the health and performance of IT systems and network infrastructure serving over 100 staff, identifying and responding to faults in a timely manner to minimise downtime.
- Diagnosed and resolved hardware, software and network faults across the organisation, systematically troubleshooting issues and escalating complex cases to the appropriate teams for resolution.
- Maintained a structured IT fault and resolution log, tracking the status of all reported issues from creation through to closure and providing management with clear progress updates.
- Prepared regular shift and operational reports documenting all technical activities, system status updates, fault trends and resolutions carried out during each period.
- Conducted routine system checks and availability monitoring across workstations and network devices to ensure all equipment remained operational and correctly reporting on internal systems.
- Coordinated with administrative and operations teams to align IT support activities with business continuity requirements, ensuring critical systems remained available at all times.

Information Security Intern | Nigerian National Petroleum Company Ltd (NNPC), Abuja 2023

- Monitored enterprise network segments for anomalies, security threats and performance issues using tools including Wireshark, Nmap and Nessus, identifying vulnerabilities and escalating findings for remediation.
- Conducted structured penetration tests and vulnerability scans across multiple network segments using Pentra and Nessus, producing detailed reports that ranked issues by severity and outlined clear remediation steps.
- Supported the configuration and monitoring of network access controls and data security systems, ensuring continuous visibility into system behaviour and rapid response to flagged events.
- Tested backup systems and security procedures, documenting outcomes and updating technical records to reflect current network configurations and threat status.
- Collaborated with the IT and InfoSec teams to monitor live network activity, respond to escalated alerts and implement countermeasures that restored normal system operation.
- Delivered structured technical reports and briefings to senior management, communicating fault status, risk findings and corrective actions in a clear and professional manner.

Data Entry Personnel | Overcommer Telecommunication, Nasarawa 2019

- Maintained accurate records across company databases and ensured data integrity across all operational entries using Microsoft Excel and Google Sheets.
- Applied data confidentiality protocols consistently and supported reporting tasks that required structured documentation and attention to detail.

EDUCATION

M.Sc. Communication Information Systems | Air Force Institute of Technology (AFIT), Kaduna Mar 2026 – Present

B.Sc. Cyber Security | Air Force Institute of Technology (AFIT), Kaduna Mar 2021 – Oct 2024

Core areas of study: Network Administration, Network Security, Ethical Hacking, Enterprise Perimeter Design, Systems Monitoring, Risk Assessment and Data Privacy

CERTIFICATIONS & TRAINING

- Networking Essentials — Cisco Networking Academy
- HCIA Cloud Computing V4.0 — Huawei University
- Cybersecurity Essentials — ISC²
- Mastercard Cybersecurity Virtual Experience — Forage

TECHNICAL SKILLS

Network Monitoring & Analysis: Wireshark, Nmap, Nessus Vulnerability Scanner, Network Fault Detection, Performance Analysis, Traffic Monitoring

Systems & Infrastructure: IT Infrastructure Management, Server and Hardware Administration, System Availability Monitoring, Fault Escalation and Ticketing

Security Tools: Pentera, Nessus, DLP Systems, Access Control Management, Threat Detection and Incident Response

Reporting & Documentation: Shift Reports, Ticket Analysis, Monthly Performance Reports, Microsoft Excel, Microsoft PowerPoint, Operational Logs

Cloud & Collaboration: Google Workspace, Microsoft Teams, Slack, Microsoft 365

Programming: Python, Java, HTML and CSS

Languages: English (Native Speaker), Idoma, Igbo, Hausa
