

FRANK OCHIGBO, SUNDAY

System Administrator / IT Support Engineer

frankochigbo@gmail.com | +234 903 609 9000 | Abuja, Nigeria | linkedin.com/in/crypterib

PROFESSIONAL SUMMARY

IT Support Engineer and Cybersecurity graduate with hands-on experience in end-user helpdesk support, IT infrastructure administration, and information security. Delivered first- and second-level technical support across hardware, software, and network environments at the Infrastructure Concession Regulatory Commission (ICRC) and conducted penetration testing and DLP implementation at NNPC. Brings a strong security-first mindset to system administration including endpoint protection, access control, vulnerability management, and incident response. Adept at maintaining documentation, supporting hybrid work environments, and ensuring infrastructure continuity for business-critical operations.

PROFESSIONAL EXPERIENCE

IT Support (NYSC)

Jan 2025 – Jan 2026

Infrastructure Concession Regulatory Commission (ICRC) | FCT, Abuja

- Provided first- and second-level helpdesk support for hardware, software, and network-related issues, ensuring timely resolution of incidents in line with service-level expectations.
- Managed user account provisioning, password resets, and access control activities in alignment with the organisation's Identity and Access Management policies.
- Administered and monitored Windows-based workstations and servers, performing routine maintenance, software patching, and performance checks to maintain system availability.
- Supported deployment, configuration, and ongoing maintenance of IT infrastructure including network devices, desktop endpoints, and business applications including Office 365.
- Enforced endpoint security controls including antivirus management, MFA enablement, and least-privilege access to reduce the organisation's attack surface.
- Maintained and updated IT asset records covering hardware inventory and procurement documentation to support asset lifecycle management.
- Documented all IT incidents, resolutions, and system configurations to build a structured knowledge base and improve operational efficiency.

Information Security Intern

2023

Nigerian National Petroleum Company Limited (NNPC) | FCT, Abuja

- Executed penetration tests using Pentera to identify vulnerabilities across the organisation's network infrastructure, producing findings reports with actionable remediation recommendations.
- Assisted in the implementation of a Data Loss Prevention (DLP) solution, enforcing data security policies and ensuring regulatory compliance across endpoints and email gateways.
- Administered endpoint protection tools and conducted periodic vulnerability scans, collaborating with the InfoSec team to track and close remediation activities within agreed timelines.
- Enforced security controls including least-privilege access, password policies, and network segmentation in line with the organisation's IT governance framework.
- Participated in incident response activities and contributed to the documentation of security assessments, threat models, and recommended countermeasures to improve IT security posture.

Data Entry Personnel

2019

Overcommer Telecommunication | Karu, Nasarawa

- Maintained accurate records across company databases using Microsoft Excel, Google Sheets, and internal database management tools.
- Applied data protection principles to ensure the confidentiality and integrity of sensitive information in compliance with company policies.

EDUCATION

B.Sc. Cyber Security

Oct 2024

Air Force Institute of Technology (AFIT), Kaduna | CGPA: 4.34 / 5.0

- Relevant coursework: Network Security, Ethical Hacking, Operating Systems, Database Administration, Cloud Computing, Cryptography.
- Final year project focused on blockchain-based security verification systems.

M.Sc. Communication Information Systems

2026 – Present (In View)

Air Force Institute of Technology (AFIT), Kaduna

TECHNICAL SKILLS

Systems & OS: Windows Server (administration, patching, performance monitoring), Linux (Ubuntu), Windows 10/11 desktop support

Networking: TCP/IP, DNS, DHCP, VPN configuration, firewall management, network troubleshooting, ISP failover concepts

Security Tools: Pentra (penetration testing), NMap (network scanning), Wireshark (packet analysis), antivirus / EPP management

Endpoint Security: Endpoint protection administration, MFA enforcement, least-privilege access controls, DLP implementation

Backup & Recovery: On-premise server backup monitoring, external drive rotation procedures, restore verification

Cloud & Productivity: Office 365 administration, HCIA Cloud Computing (Huawei), Virtual Machine management (VirtualBox / VMware)

Scripting & Dev: Python, Java, Solidity; basic HTML/CSS; command-line administration

Documentation: Incident logging, network topology documentation, IT asset registers, system configuration records

CERTIFICATIONS & TRAINING

- **Mastercard Cybersecurity Virtual Experience Programme** — Forage / Mastercard Security Awareness Team
- **Networking Essentials** — Cisco Networking Academy
- **HCIA-Cloud Computing V4.0** — Huawei University
- **Cybersecurity Essentials** — ISC²
